**Aspects of mother's personality of children with
Developmental Glaucoma**

**Authors: Carla Ferracina; Norma Lottenberg Seme; Paulo Augusto de
Arruda Mello**

Name: Carla Ferracina Sector and University: Congenital Glaucoma –
UNIFESP-EPM

Purpose: To evaluate deep aspects of mothers' personality who have a child with Developmental Glaucoma, in order to get a knowledge of the structure and dynamic of their psychic process.

Material and methods: Fifteen mothers who have a child with Developmental Glaucoma from the Congenital Glaucoma Department of UNIFESP and fifteen mothers with a child without any visual problem were evaluated through the projective Method of Rorschach and an interview.

Results and Conclusion: The work has not been concluded yet.
